

# Inverted Umbrella Canopy

The inverted Umbrella is just that; an inverted (upside down) umbrella. This structure is very popular with our customers who want to create a statement entrance canopy or walkway. As you can see from the image over the page, an eye catching effect can be achieved when these canopies are lit up at night and we will be happy to use our experience to help you create the effect you are looking for.

Please refer to our comprehensive canopy buyer's checklist to help you to specify the canopy that best suits your needs and make a fair comparison between different potential suppliers.
